JetStor and Hammerspace

Integrating JetStor NAS into the Hammerspace Data Platform

SOLUTION BRIEF

Overview

As datasets continue to grow, the demand for high-value solutions for NAS, SAN, and cloud storage becomes paramount. Accommodating this data growth requires high-performance, scalable storage solutions.

The combination of JetStor high-performance unified NAS storage and the Hammerspace Data Orchestration solution offers a compelling solution for enterprise workloads. By combining the purpose built storage appliances with the advanced Data Orchestration capabilities of Hammerspace, organizations can seamlessly integrate and optimize NAS storage in their Global Data Environment.

Solution Benefits

Global Data Visibility

- Gain a comprehensive view of your data across all storage systems, sites, and clouds. Seamlessly transform your data into a true global namespace and easily introduce JetStor into a Hammerspace environment.

Automated Data Orchestration

- Overcome data gravity challenges with automated, non-disruptive data orchestration on a global scale, regardless of whether your data resides at the edge, in datacenters, or in the cloud, Hammerspace ensures seamless data orchestration.

Use Cases
AI
Cloudscale
HPC
Digital Content

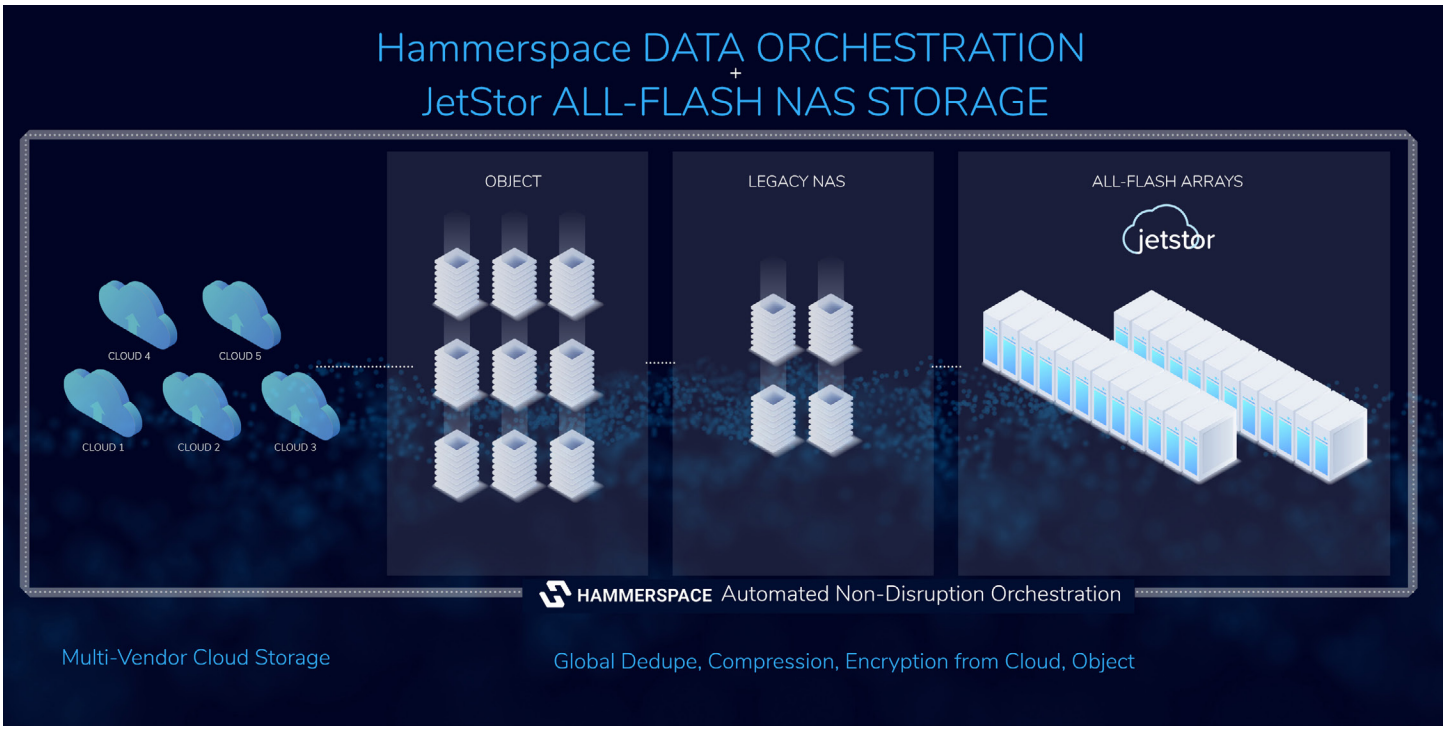

Scalable Storage for Large Datasets

- With datasets growing to support cloud infrastructure and next-generation AI workloads, the ability to scale storage is critical. JetStor NAS All Flash Head Appliance supports 50-780TB with ability to up to Qty 10 JBODs with total capacity of 8PB.
- JetStor NAS Hybrid Supports All Flash 780TB with ability to add Qty 4 102 JBODs with 24TB drives with HDD space at 10PB

GPUDirect Storage Integration

- Harness the power of GPUDirect Storage instantly by deploying Hammerspace on top of a JetStor NAS All Flash or Hybrid solution. Unlock accelerated data access and processing capabilities to drive enhanced performance and efficiency.

About JetStor

JetStor meets the evolving needs for data storage, protection, and management. We leverage leading technologies to offer high-value solutions for NAS, SANs, clouds, and hyper-converged infrastructures (HCIs).

Since 1994, our customers have spanned virtually every industry, and range from Fortune 500 enterprises to small and medium-sized firms. We support environments from data centers and clouds to branch offices and remote sites.

JetStor has prospered for decades thanks to our experienced management team and a business model focused on providing every customer with highly competitive NAS solutions, services, and support. We align JetStor's priorities with yours to ensure your systems remain effective throughout their life cycles.

About Hammerspace

Hammerspace is a powerful scale-out software solution designed to automate unstructured data orchestration and global file access across storage from any vendor at the edge, in data centers, and the cloud. Hammerspace makes data a global resource, so IT staff can automate data orchestration by policy, but without interrupting user access. It enables organizations to extend the life of existing storage resources to reduce costs, while also enabling the flexibility of hybrid-cloud and multi-site use cases seamlessly.
